## Turn-Key

STOVE is one of the first truly turn-key enterprprise cloud based POS systems. Hard to believe, when everyone seems to make a similar claim. Why is STOVE able to make this statement?

STOVE provides all the reporting, sales, crm, loyalty, payment, reservations and online and mobile ordering in a single system able to handle multiple locations

**ALL IN ONE**

## FoH and BoH

STOVE provides all the management needs for both the Front of House and the Back of House including inventory, vendor management, kitchen management and KDS.

## RECIEVE THE SUPPORT YOU NEED, WHEN YOU NEED IT.

With our enterprise class support that provides a dedicated account manager and a full support team including engineering that work together to address any concern you may have when you have it with 24/7/365 support.

**SUPPORT**

### ONSITE SERVICES

We can provide onsite installation, support and maintenance to ensure your operations are running at the best performance. No longer will you have to say sorry it has been broken for weeks or months.

### MANAGEMENT

Cloud based management for all locations based on roles and permissions allows easy monitoring and making changes for 1 or multiple locations.

**OVERVIEW**

# ENTERPRISE

# POINT OF SALE

# WHAT IS STOVE

STOVE is Enterprise Grade Omni Channel Cloud Based Turn Key Point of Sale.

It has built-in all the tools and functions you need to not only operate your restaurant but all the tools to truly know your guests.

## WHY STOVE

Really the question should be why not STOVE. STOVE does so much more than just simply point of sale functions. It has the ability to scale from 1 location to thousands of locations with no slow down.

**MODERN**

# OMNI CHANNEL

STOVE is built to handle millions of transactions daily should you have that need. It can accept orders from the built in online, mobile, drive thru and kiosks order channels.

It offers one of the most stable and redundant backends maximizing your restaurants uptime.

Multiple Role based users can access 1-ALL of your locations with permissions based menus.

Utilize our best in class all in one system or connect with 3rd party tools using our OPEN API

Full dynamic reporting allows you to view and extract data from any data point

Modern Online and Mobile ordering combined with built in DSP order aggregation and reporting.
